Industrial-Grade Control Solution

The XDL21 series industrial push button switch features an integrated indicator lamp, providing reliable ON/OFF control and status visibility. Engineered with high-grade anti-flame plastic and zinc alloy, this switch is built for longevity and durability in demanding environments. Its IP65 waterproof rating ensures excellent protection against dust and moisture ingress, making it suitable for control panels and industrial machinery.

Technical Specifications

Specializing in production of buttons and indicators since 1997

Rugged industrial push button configured for reliable on/off control.

Electrical Ratings

600 V

Insulation Voltage (Ui)

10 A

Thermal Current (Ith)

6 kV

Impulse Withstand (Uimp)

Performance Parameters

Metric	Value
Operating Temp	-5°C to +55°C
Storage Temp	-25°C to +70°C
Mechanical Life	3 Million Operations
Protection Rating	IP65

Contact Features

- Special silver alloy contacts
- High anti-electrical erosion properties
- Slow breaking mechanism
- Reliable NC contact breaking
