## Product Overview

### High-Performance 3-Gang Marine Switch Panel

This versatile 3-way rocker switch panel is engineered for reliability in demanding marine, automotive, and RV environments. Featuring a rugged aluminum alloy construction, it provides robust control for three independent electrical circuits, complete with a dedicated horn button. The integrated digital voltmeter and dual USB charging ports ensure you can monitor your battery levels and charge mobile devices simultaneously, making it an essential upgrade for any power-management setup.

## Technical Specifications

### Rated Current

**20 A**

Rating at 12V

**10 A**

Rating at 24V

<b>Voltage Compatibility</b>	12V DC, 24V DC
<b>USB Output Capacity</b>	5V 3.1A (2.1A + 1A)
<b>Voltmeter Monitoring Range</b>	5V - 30V
<b>Operating Temperature Range</b>	-25°C to +80°C

## Construction & Design

### Material Composition

- Aluminum Alloy
- ABS Plastic
- Metal

### LED Illumination

Blue LED

### Switch Function

ON-OFF

## Application & Support

### Compatible Applications

Marine, Car, Truck, RV, Yacht

### Warranty

1 Year
