Product Overview

Industrial-Grade Polishing Performance

This versatile abrasive roll is engineered specifically for the efficient polishing of normal steel. Featuring a specialized waterproof and oilproof construction, it ensures consistent performance and durability even in demanding metalworking environments. The product is designed to provide effective material removal, making it a reliable choice for professional automotive, metalworking, and woodworking applications.

Technical Specifications

Available Grit Sizes

- 60
- 180
- 240

Abrasive Material

Aluminum Oxide

Performance Features

Resistance

Waterproof, Oilproof

Application Suitability

Industries

Metalworking • Woodworking • Automotive

Primary Application

Narrow belt polishing of normal steel
