

# Waterproof Plastic Enclosure for Electronics

This waterproof plastic enclosure is designed to protect electrical and electronic components in various environments. It features a clear polycarbonate lid and beige ABS base, suitable for both indoor and outdoor use.

## ADDITIONAL IMAGES

## Product Overview

### Durable Protection for Electronics

This high-quality waterproof junction box is designed to provide robust protection for sensitive electronic components in both indoor and outdoor environments. Constructed from durable ABS plastic, it features a transparent cover for easy inspection and mounting flanges for secure installation. The enclosure is engineered to be non-corrosive, anti-static, and moisture-proof, making it an ideal choice for control boxes, power distribution, and industrial automation projects.

## Physical Dimensions

### External Size

**240 mm**

Length

**120 mm**

Width

**75 mm**

Depth

## Technical Specifications

### Protection Level

IP65

### Material

ABS Plastic

### Model

HF-H-15

### Color

Light grey

## Features & Capabilities

### Key Features

- Transparent cover for visibility
- Includes mounting screws
- Integrated mount flanges
- Non-corrosive and anti-static
- High hardness and durability

### Customization Services

New mold design, Drilling holes, Custom colors, Painting, Logo printing

## Applications

### Suitable Applications

- Control boxes
- Power distribution instrument boxes
- Electronics enclosures
- Industrial automation
- Telecommunications
