

Waterproof Push Button Switch with Protective Cap

This waterproof push button switch is designed for on/off control in various electrical applications. It features a protective cap for enhanced durability and resistance to environmental factors.

Product Overview

Professional Industrial Switching

This double-headed waterproof push button switch provides reliable on/off control for demanding industrial environments. Built with a robust zinc alloy body and high-grade anti-flame plastic, it is designed for durability and longevity. With an IP65 protection rating and a secure protective cap, it ensures safe operation in distribution cabinets and control systems.

Technical Specifications

Ingress Protection

IP65

Rated Insulation Voltage

660 V

Conventional Heating Current

10 A

Mechanical Life (Pushbutton)

1000000 ops

Operating Temperature

-5°C to +55°C

Certifications & Standards

Certifications

CE, RoHS, IEC60947-5-1

Electrical Performance

Contact Resistance

d25 Ω

Insulation Resistance

e5M Ω

Mounting Dimensions

XDL21-CB9325

Double-headed push button with boot
 1 flush green marked I
 1 flush red marked O
 IP65

N/O+N/C

1 flush green marked I
 1 projecting red marked O
