

# Waterproof SMD 3528 LED Flexible Strip

This high-density SMD 3528 LED flexible strip is designed for various lighting applications. Its waterproof construction makes it suitable for both indoor and outdoor use, providing bright and energy-efficient illumination.

## Product Overview

### Versatile LED Lighting Solution

This high-density SMD 3528 LED flexible strip is engineered for both indoor and outdoor lighting applications. Designed for durability and flexibility, it serves as an excellent choice for accent lighting, signage, and decorative purposes. Its waterproof construction ensures reliable performance in diverse environments, while the adhesive backing allows for quick and easy installation.

## Technical Specifications

### Suitable Environments

Indoor • Outdoor • Water Processing Engineering

LED Type	SMD 3528
Key Features	Waterproof, Flexible, Adhesive Backing, Cuttable
Installation	Adhesive backing with cut-to-length capability
