Professional Outdoor Solar Solution

This solar-powered LED bollard light provides a sustainable, high-efficiency lighting solution for gardens, pathways, and public landscapes. Engineered with a durable aluminum alloy body and crystal glass, it offers superior weather resistance and an IP65 waterproof rating. Featuring advanced ALS technology, this light maintains 100% brightness throughout the night and can provide illumination for 6-8 days even in challenging weather conditions.

Technical Specifications

Ingress Protection

IP65 Waterproof

Materials

Aluminum Alloy, Crystal Glass

Installation

Underground stake design for wireless, tool-free setup
