

Waterway Core Barrel with Roller Bit

This waterway core barrel is designed for efficient rock drilling and piling operations. Its robust roller bit ensures effective core extraction, while the waterway design facilitates continuous flushing to prevent clogging and enhance drilling performance.

Product Overview

Waterway Core Barrel with Roller Bit

The Waterway Core Barrel is a specialized drilling tool engineered for efficient rock drilling and piling operations. Featuring a robust roller bit, this tool ensures effective core extraction even in challenging geological formations. The integrated waterway design facilitates continuous flushing and cooling of the cutting area, which prevents clogging and significantly extends the lifespan of the bit.

Technical Specifications

Cutting Tool Type	Roller or Hob with water channel
Applicable Formations	Very hard rocks, Reinforced concrete
Customization	Yes
Customization Note	Technical parameters can be customized according to customer needs.
