

# WD615 Euro 2 Diesel Engine

This diesel engine delivers optimal power while maintaining low fuel consumption. Its design ensures durability and minimizes emissions.

## Overview

### High-Performance Diesel Engine

The WD615 Euro 2 Diesel Engine is a 10L powerhouse designed for efficiency and durability. It features a wide maximum torque speed range of 1100-1600 r/min, ensuring excellent acceleration and gradeability. With a focus on fuel economy, it achieves a low fuel consumption ratio of 193g/kW.h, making it a competitive choice for heavy-duty applications.

## Performance Metrics

### Lowest Fuel Consumption Ratio

**193 g/kW.h**  
Fuel Consumption

|                        |                 |
|------------------------|-----------------|
| Displacement           | 10 L            |
| Max Torque Speed Range | 1100-1600 r/min |

## Compliance & Standards

Emission Standard  
Euro 2

## Key Features

### Engine Advantages

- Wide speed range at maximum torque
- High torque backup coefficient
- Improved acceleration and grade ability
- Optimized durability through design upgrades
- Low fuel consumption in medium and low speed zones
