

WD615/618 Series Diesel Generator Set

The WD615/WD618 series land generating sets are robust and reliable power solutions designed for a variety of applications. These diesel generator sets are engineered for high performance and durability, ensuring a stable power supply in demanding environments.

Overview

Reliable Power Solutions

The WD615/618 Series land diesel generating sets are engineered for high-performance and durability in demanding industrial and commercial environments. Powered by advanced diesel engines, these units provide stable power ranging from 100kW to 220kW. Designed for longevity and ease of maintenance, they serve as excellent solutions for both continuous and standby power requirements.

Technical Specifications

Power Range

100 kW

Minimum Power

220 kW

Maximum Power

Rated Speed

1500 rpm

Manufacturing Standard

GBT2829-1997

Configuration & Features

Generator Variations

- Normal generating set
- Automatic generating set
- Plateau generating set

Mounting Options

Trailer Type, Closed Frame Type

Control & Protection

Alarm Functions

- Oil pressure over-limit alarm
- Cooling water temperature over-limit alarm

Available Add-ons

Parallel equipment • Common base oil tank • ATS • Remote control • Silencing type • Rain-proof shield
