

Wear-Resistant Steel Ball

These steel balls are designed for use in demanding industrial applications. They offer high durability and resistance to wear, which ensures long-lasting performance in machinery and equipment.

Product Overview

High-Performance Wear-Resistant Steel Balls

These precision-engineered steel balls are designed for demanding industrial applications requiring maximum durability. With specialized heat treatment, they offer superior resistance to wear and impact in grinding and crushing environments. Available in a wide range of sizes, these components ensure long-lasting performance and operational reliability for heavy-duty machinery.

Technical Specifications

Hardness Range by Diameter

Diameter (mm)	Primary Hardness (HRC)	Secondary Hardness (HRC)
40-60	60-64	59-63
70-80	60-64	58-62
90-100	60-64	57-61
110-140	55-60	52-58

Applications

Primary Applications

Grinding, Crushing, High-impact processes, Industrial machinery
