

Weatherproof Audio Enclosure with Ridged Design

This enclosure is designed to house audio components, offering protection from the elements. It features a ridged front for enhanced durability and side mounting tabs for easy installation.

Product Overview

Rugged Weatherproof Audio Enclosure

This specialized rectangular enclosure is engineered for demanding environments, providing reliable protection for sensitive audio and electronic components. Featuring a distinctive ridged design for structural integrity and heat dissipation, the unit is fully sealed to support outdoor deployment. Integrated mounting tabs on the sides allow for quick and secure installation in various mounting configurations.

Technical Specifications

Primary Application

Outdoor Rated • Audio Electronics Protection

Construction Details

- Ridged front surface design
- Sealed, weather-resistant chassis
- Integrated side mounting flanges

Design Type

Weatherproof Ridged Housing

Mounting Features

Side Mounting Tabs, Surface Mount
