Product Overview

Robust Weatherproof Electrical Solutions

These weatherproof electrical switches and sockets are engineered to provide reliable performance in harsh outdoor and industrial environments. Featuring high-grade protection against dust, water, and mechanical impact, they ensure safety and longevity in demanding applications. The range is designed for versatility, covering a broad spectrum of current ratings and configuration needs for professional installations.

Technical Specifications

IP Rating

IP66

Rated Current Range

10 - 63 A

Pole Configuration

1 - 4 Pole

Compliance & Certification

SAA, CE

Featured Models

Standard Configuration Table

Model ID	Rated Current	Voltage
56SW220-K1	32A	500V
UKF4-220	20A	350V
