

Weatherproof Outdoor Electrical Socket Enclosure

Weatherproof outdoor electrical socket enclosures protect electrical connections from the elements. They feature a hinged lid with a secure latch, durable housing, and a gasket seal to prevent water ingress.

Product Overview

Rugged Weatherproof Protection

This weatherproof outdoor electrical socket enclosure is engineered to provide robust protection for electrical connections in challenging environments. Designed with a secure hinged lid, reliable latch system, and an integrated gasket seal, it effectively prevents water ingress and ensures long-term safety. It is an ideal solution for professionals requiring dependable and safe power access in damp or exposed outdoor settings.

Technical Specifications

Cable Gland Compatibility	PG13.5
Model Reference	A152

Features

Key Protective Features	Weatherproof, Water Ingress Protection, Hinged Lid, Secure Latch, Gasket Seal
