Product Overview

Robust Weatherproof Protection

This outdoor equipment cabinet is engineered to safeguard sensitive electronic and communication hardware against harsh environmental conditions. With a static load capacity of 800kg and a durable cold-rolled steel construction, it provides a reliable, secure housing for telecommunications and industrial control systems. The design prioritizes ease of maintenance with removable panels and flexible installation options, including adjustable feet and castors.

Physical Specifications

Static Loading Capacity	800 kg
Material	SPCC Cold Rolled Steel
Mounting Profile Thickness	2 mm
Other Panel Thickness	1.2-1.5mm

Design & Features

Door Configuration

- Tempered glass front door
- Steel rear door

Access Features	Removable front door, Removable rear door, Removable side panels
Ventilation	Yes

Installation & Mobility

Mobility

Adjustable feet • Castors

Surface Treatment

Surface Finish Process

- Degreasing
- Pickling
- Phosphoric
- Cleaning
- Power coated
