Product Overview

Heavy-Duty Web Sling End Fitting

This robust end fitting is engineered for secure and reliable load management in demanding industrial, construction, and transportation applications. Constructed from high-strength metal with a corrosion-resistant finish, it offers exceptional load-bearing capacity and resistance to wear. The versatile design features multiple attachment points, including circular and slotted holes, ensuring compatibility with a wide range of web sling and tie-down systems.

Compliance & Certification

Certifications

CE, TÜV Rheinland Certified

Technical Features

Material & Finish

- High-strength metal construction
- Corrosion-resistant protective coating
- Wear-resistant design

Design Features

- Multiple attachment points
- Integrated circular holes
- Integrated slotted holes
- Engineered for easy installation

Application

Recommended Applications

Industrial • Construction • Transportation • Load Management
