

Wedge-Shaped Door Stop Alarm

This wedge-shaped door stop alarm prevents unauthorized entry with an audible alert. Pressure on the stainless steel plate triggers a loud siren.

Product Overview

Security Wedge Alarm

This wedge-shaped door stop alarm is a portable security solution designed to prevent unauthorized entry in homes, offices, or while traveling. When pressure is applied to the stainless steel pressure plate, the device triggers a high-decibel siren to deter intruders. Its durable ABS plastic construction and non-slip grooved design ensure reliable performance on a variety of floor surfaces.

Technical Specifications
