

Weighing and Measuring Apparatus

This apparatus is designed for precise weighing and measurement tasks. It is constructed from durable materials, suitable for a variety of industrial and commercial applications.

Product Overview

Precision Weighing and Measuring

This professional-grade weighing and measuring apparatus set offers high-durability construction suitable for various industrial and lab-based weighing tasks. The set includes two distinct designs featuring ribbed, heavy-duty bodies optimized for stability and precise measurement. With integrated suspension loops, these tools are built for easy integration into existing measurement rigs and hanging scale systems.

Technical Specifications

Available Designs

- Flared bell-shaped body with vertical grooves
- Tiered design with vertically ribbed midsection

Material Composition

Cast Metal, Durable Construction

Suspension Method

Integrated top-mounted suspension loop

Usage Information

Applications

Industrial Weighing • Precise Measurement • Laboratory Use
