

Weighted Sinking Lead Rope for Fishing Nets

This lead rope is designed for weighting fishing nets and lines, ensuring they sink properly. Constructed from durable, synthetic materials, it offers excellent strength and abrasion resistance in marine environments.

Product Overview

Professional Grade Sinking Lead Rope

This high-density lead rope is engineered specifically for commercial fishery applications, providing optimal sinking weight for fishing nets and lines. Constructed from durable, braided synthetic fibers, it offers exceptional resistance to abrasion, UV degradation, and harsh marine environments. The flexible design ensures easy handling, knotting, and reliable deployment, while sealed ends prevent fraying to maintain integrity over extended use.

Technical Specifications

Primary Applications

- Net weighting
- Line deployment
- Mooring
- General rigging

Performance Metrics

100 % Sinking Efficiency	1 High Abrasion Resistance Level
------------------------------------	--

Construction Material	Braided synthetic fibers with integrated lead weighting
Key Features	Sinking, Abrasion Resistant, UV Resistant, Chemical Resistant, Flexible
