

Weldable Steel Pipe Fittings

These seamless steel fittings are designed for welding into piping systems. They provide robust, leak-proof connections for industrial, plumbing, and construction applications.

Product Overview

Industrial Seamless Weldable Fittings

These seamless steel weldable fittings are engineered for robust performance across industrial, plumbing, and construction applications. Designed to create leak-proof connections, they provide the durability required for demanding piping systems. The collection includes various configurations such as concentric and eccentric reducers to accommodate diverse project specifications.

Technical Specifications

Available Configurations

- Seamless Steel Pipe Fittings
- Concentric Reducers
- Eccentric Reducers

Applications

Industrial Piping • Plumbing • Construction

Material Composition

High-quality seamless steel

Key Features

Seamless Construction, Weldable, Leak-proof, Industrial Grade
