

Welded Segmented Diamond Grinding Wheel

This is a single-row, welded segmented diamond grinding cup wheel. It is designed for grinding and polishing materials like granite, marble, concrete, and natural stone.

Product Overview

Professional Diamond Grinding Solutions

This single-row welded segmented diamond grinding cup wheel is engineered for high-efficiency material removal and surface preparation. Its robust construction ensures aggressive grinding action and an extended service life on concrete and stone surfaces. The optimized segmented design facilitates superior dust extraction and cooling to maintain consistent performance during demanding tasks.

Key Features

Suitable Materials

Concrete, Stone, Hard Materials

Technical Dimensions

Wheel Specifications

Item No	Diameter (mm)	Bore (mm)	Segments
NFSRW04	105	22.23	8
NFSRW45	115	22.23	9
NFSRW05	125	22.23	9
NFSRW06	150	22.23	10
NFSRW07	180	22.23	12
