

# Welding and Cutting Torch Kit with Regulators

This comprehensive welding and cutting torch kit is designed for various metalworking applications. The kit includes a cutting torch handle, welding nozzles, a cutting tip, oxygen and acetylene regulators with gauges, a length of hose, and other essential accessories.

## Overview

### Professional Metalworking Kit

This comprehensive welding and cutting torch kit is engineered for versatility and reliability in various metalworking applications. It features a complete set of essential tools, including a cutting torch handle, welding nozzles, a cutting tip, and precision regulators for both oxygen and acetylene. Designed for professional and DIY use, this kit supports efficient welding, brazing, soldering, and cutting operations, all housed in a durable carrying case for organized storage and portability.

## Kit Contents

### Included Components

- Cutting torch handle
- Welding nozzles
- Cutting tip
- Oxygen regulator with gauge
- Acetylene regulator with gauge
- Welding/Cutting hose
- Durable carrying case

## Application

### Suitable Users

Professional • DIY

### Primary Applications

Welding, Brazing, Soldering, Metal Cutting

## Portability

### Storage

Durable carrying case included
