

Welding Cable Connector

These welding cable connectors are designed to provide a secure and reliable connection for welding cables. They are constructed with durable materials suitable for demanding industrial environments and ensure optimal performance and safety.

Product Overview

Industrial Grade Welding Cable Connector

This high-quality cable joint is designed for industrial applications, providing a secure and reliable connection for welding cables to ensure optimal performance and safety. Constructed with durable materials for long-lasting use in demanding environments, it is ideal for apparel and textile machinery as well as other industrial settings. These connectors are available in various amperage ratings to suit different professional welding needs.

Technical Performance

Rated Current Capacity

300 A

Standard Rating

500 A

High Capacity

Model Series

CJ05

Application & Durability

Intended Applications

- Apparel Machinery
- Textile Machinery
- Industrial Welding Systems
- Heavy-duty Cable Joining

Key Features

High-Quality, Industrial Grade, Durable Construction, Secure Connection

Safety & Reliability

Yes
