Product Overview

Industrial Welding Electrode Holders

These professional-grade electrode holders are engineered for diverse industrial welding applications. Offering a wide range of international design standards—including German, Japanese, Korean, and American types—these tools provide reliable performance for welding tasks ranging from 200A to 800A. Each unit is built with high-durability materials to ensure consistent conductivity and safety in demanding professional environments.

Technical Specifications

A display of various international welding holder designs including Korean, German, and French types.

Professional selection of electrode holders, featuring Jackson and Tip Head American designs.

Available Design Standards

- German Type
- Japanese Type
- Korean Type
- American Type
- French Type
- Russian Type
- British Type
- Jackson Type
- Air Gouging
- Burnproof Elaborate

Supported Current Ratings

200A, 250A, 300A, 350A, 400A, 500A, 600A, 700A, 800A

Logistics & Packaging

Assortment of earth clamps and holders showing various packaging quantities.

Carton Specifications

Standard Type	Qty per Carton	Gross Weight (kg)
German Type (Standard)	25	11
Japanese Type (Standard)	50	28
Korean Type (300A)	50	20
Earth Clamp (Netherland)	100	18
