

Welding Ground Clamp

This heavy-duty ground clamp is designed for welding applications. It features robust metal construction with copper connectors for optimal conductivity and secure grounding.

Product Overview

Heavy-Duty Welding Ground Clamp

This heavy-duty earth clamp is engineered specifically for demanding welding applications. Featuring a robust metal construction and a high-tension spring, it ensures a secure and stable grounding connection during operation. With integrated copper connectors for optimal conductivity, this tool provides efficient current transfer for a wide range of welding processes.

Technical Specifications

Construction Material	Robust Metal
Conductivity Components	Copper Connectors
Clamping Mechanism	High-tension spring

Features

Key Features	Heavy-duty, High conductivity, Secure grounding, Industrial grade
--------------	---

Application

Suitable Welding Processes

- General Welding
- Industrial Metalwork
