

Welding Hand Shield

This welding hand shield protects welders from sparks, spatter, and harmful radiation. Its lightweight design and ergonomic handle ensure comfortable use and precise control.

Product Overview

Professional Welding Hand Shield

The JS-WH20 welding hand shield is engineered to provide essential protection for welders against sparks, spatter, and harmful radiation. Constructed from durable, heat-resistant materials, it offers a reliable barrier for the face and eyes during intense welding operations. Its lightweight, ergonomic design ensures comfort and precise control, making it an ideal choice for arc, MIG, and TIG welding applications.

Technical Specifications

Protection Features

- UV Radiation Protection
- IR Radiation Protection
- Spark and Spatter Resistance

Compatible Welding Processes

Arc Welding, MIG Welding, TIG Welding

Design & Ergonomics

Design Highlights

Heat-Resistant • Lightweight • Ergonomic Handle
