

Welding Inspection Gauge

This stainless steel welding gauge is designed for measuring weld dimensions and angles. It includes scales to measure weld reinforcement, fillet weld size, and angle of preparation.

Product Overview

Professional Welding Inspection Gauge

This high-precision inspection tool is crafted from durable stainless steel to ensure long-lasting performance in demanding industrial environments. It provides essential measurement capabilities for weld reinforcement, fillet weld sizes, and angles of preparation. Designed for accuracy, this gauge is an indispensable asset for quality control professionals seeking to maintain strict welding standards.

Technical Specifications

Features

- Weld reinforcement measurement
- Fillet weld size gauging
- Angle of preparation check

Material

Stainless steel

Supported Angles

30°, 45°, 60°

Key Performance Metrics

Primary Calibration Unit

1 MM

Metric Calibration
