

# Welding Torch Component Parts

These are component parts for welding torches. The parts include gun tubes, nozzle adapters, gas diffusers, gas diffusers, and contact tips.

## Product Overview

### Professional Welding Torch Components

This comprehensive range of welding torch replacement parts is designed to maintain optimal performance and longevity for your welding equipment. The selection includes essential components such as gun tubes, nozzle adapters, gas diffusers, contact tips, and nozzles. Each part is engineered for precise fitment and reliable gas flow, ensuring consistent welding results for professional applications.

## Compatibility & Range

### Part Identification Table

Component Type	Function
Gun Tube	Main torch assembly conduit
Nozzle Adapter	Interface between torch and nozzle
Gas Diffuser	Ensures smooth gas coverage
Contact Tip	Conducts current to the wire
Nozzle	Directs shielding gas
Insulated Guide	Maintains wire alignment

**Available Component Types** | Gun Tubes, Nozzle Adapters, Gas Diffusers, Contact Tips, Nozzles, Insulated Guides
