

Welding Torch (KR & CX Series)

Welding torches are available in KR and CX series. The torches feature detailed specifications and component breakdowns.

Product Overview

KR & CX Series Welding Torches

The KR and CX series welding torches are designed for professional industrial welding applications, offering versatility across multiple amperage ratings. This series includes comprehensive components such as swan necks, insulators, gas diffusers, contact tips, and gas nozzles, ensuring reliable performance for various welding requirements. With compatibility across 180A, 350A, and 500A models, these torches are engineered for precision and durability in demanding work environments.

Technical Specifications

Available Amperage Ratings

- 180
- 200
- 350
- 500

Compatible Models

KR500A, KR350A, KR180A, CX500A, CX350A, CX200A

Components

Standard Components

Component Name	Function/Type
Swan Neck	Core torch assembly
Connecting Rod	Structural support
Insulator	Thermal/Electrical protection
Gas Diffuser	Gas flow management
Contact Tip	Current transfer
Tip Holder	Component support
Gas Nozzle	Shielding gas delivery
Let-off Needle	Precision adjustment

Contact Tip Wire Sizes

0.6 mm
Min Wire Size

1.6 mm
Max Wire Size
