

Welding Wire and Electrode Assortment

This assortment includes a variety of welding wires and electrodes for different welding needs. Products include MIG/MAG wire, flux-cored wire, TIG wire, and welding electrodes for mild steel, stainless steel, cast iron, and hardfacing.

Product Overview

Comprehensive Welding Solutions

This professional-grade welding assortment encompasses a wide variety of high-performance welding wires and electrodes. Engineered for versatility, the range covers applications including MIG/MAG, TIG, and submerged arc welding. These materials are manufactured to international standards and hold multiple global maritime certifications, ensuring reliability for critical industrial projects.

Welding Wires

Available Wire Types

MIG/MAG Wire, Drum Wire, Flux Cored Wire, Submerged Arc Wire, TIG Wire, Submerged Arc Flux

Welding Electrodes

Electrode Varieties

- Mild Steel Electrodes (AWS E6013)
- Stainless Steel Electrodes (E308L-16)
- Low-Alloy Steel Electrodes
- Cast Iron Electrodes (WH Z-2408)
- Hardfacing Electrodes
- Heat-Resistant Electrodes

Certifications

International Certifications

ABS • CWB • JIS • BV • DNV • GL • LR • CCS • ISO9000
