

Welding Workstation

This welding workstation is a robust and versatile machine designed for a variety of welding applications. It features multiple control panels for precise adjustments of welding parameters such as amperage and voltage.

General Overview

Professional H500 Welding Workstation

The H500 Welding Workstation is a robust, professional-grade unit engineered for high-performance welding applications. Featuring a durable construction with a distinct red and black aesthetic, it is built to withstand demanding industrial environments. The system allows for precise calibration of welding parameters including amperage and voltage, ensuring high-quality results across various tasks.

Technical Features

Control Features

- Precise amperage adjustment
- Voltage control panel
- Multiple power output ports
- Accessory connection interface
