

Wet and Dry Vacuum Cleaner

This vacuum cleaner is designed for both wet and dry applications. It features a powerful motor, a large-capacity tank, and a multi-stage filtration system.

Product Overview

Versatile Wet and Dry Cleaning Performance

The JL-T2007 is a high-performance vacuum cleaner engineered for both wet and dry applications in demanding environments. Featuring a powerful motor and a robust, durable construction, it provides efficient suction for a variety of floor types including carpets and hard surfaces. Its ergonomic design and maneuverable wheels ensure ease of use and portability, while a large-capacity tank and multi-stage filtration promote productivity and improved air quality.
