

Wet Diamond Core Drill

This heavy-duty diamond core drill is designed for wet drilling applications. It is ideal for drilling precise holes in concrete, masonry, and other hard materials.

Overview

Professional Wet Diamond Core Drill

This heavy-duty diamond core drill is engineered specifically for wet drilling applications, ensuring efficient performance and extended bit life through its integrated water swivel system. Designed for durability and comfort, it features a robust motor and ergonomic handles that facilitate precise hole drilling in challenging materials like concrete and masonry. It is an essential tool for professional construction and renovation projects requiring accuracy and reliability.

Technical Specifications

Suitable Materials

Concrete, Masonry, Hard Materials

Features

Key Features

- Wet drilling capability
- Integrated water swivel
- Dust suppression system
- Ergonomic handle design

Usage

Professional • Construction • Renovation
