

WF15X/16 Microscope Eyepieces

These microscope eyepieces are designed for use with standard microscopes. They offer a 15x magnification with a 16mm field of view and are constructed with high-quality optical glass for clear images.

Overview

Professional Microscope Eyepieces

The WF15X/16 microscope eyepieces are precision-engineered optical components designed for high-clarity viewing in biological, educational, and research environments. Featuring a 15x magnification power and a 16mm field of view, these eyepieces ensure sharp, detailed observation of specimens. Constructed from high-quality optical glass, they provide reliable performance for standard microscope systems.

Optical Specifications

Magnification	15 x
Field of View	16 mm
Optical Material	High-quality optical glass

Usage

Common Applications	Biological Research, Education, Laboratory Analysis
