Product Overview

Comprehensive Flour Milling Solution

This industrial-grade milling system provides a complete turnkey solution for high-capacity wheat and maize processing. Engineered for professional flour production, the equipment encompasses the entire cycle from grinding and milling to sifting and refining. With a modular design and robust construction, the system ensures consistent flour quality and purity for commercial food processing facilities.

Technical Specifications

Core Processing Components

- Milling roller units
- Sifting systems
- Purifiers
- Pneumatic conveying systems

Supported Grains

Wheat, Maize

Service & Support

Turnkey Project Inclusions

- Custom design
- Equipment installation
- System commissioning
- Staff training

After-Sales Support

Lifelong technical service • 1 year free spare parts

Warranty Period

1 year quality guarantee
