Product Overview

Industrial Flour Milling Solutions

This professional-grade wheat and maize grist milling machine is engineered for high-capacity, continuous production in large-scale facilities. Featuring a modular multi-stage grinding system, it ensures precise particle size reduction and consistent flour quality. The robust construction integrates pneumatic conveying and advanced dust collection to maintain a clean, efficient, and hygienic operational environment.

Capabilities

End Product Applications

- Wheat Flour
- Nshima Maize Flour
- Ugali Flour
- Injera Flour

Supported Grains

Wheat, Maize/Corn

Design & Construction

Key Features

Multi-stage Grinding • Pneumatic Conveying • Adjustable Milling Parameters • Modular Design • Integrated Dust Control

Services & Guarantee

After-Sales Commitment

Service Feature	Detail
Spare Parts	1 Year Free
Quality Guarantee	1 Year
Technical Support	Lifelong Service

Turnkey Project Scope

- Specialized Engineering Design
- Installation
- Commissioning
- Worker Training
