

Wheel Hub Bearing Assembly with ABS Sensor

This wheel hub bearing assembly is designed for optimal performance and durability. The integrated ABS sensor accurately monitors wheel speed for effective anti-lock braking system functionality.

Product Overview

High-Performance Wheel Hub Assembly

This wheel hub bearing assembly is engineered for optimal performance and long-lasting durability. It features a precision-engineered bearing to ensure smooth, quiet operation while effectively reducing friction. The unit includes an integrated ABS sensor for precise wheel speed monitoring and is finished with a corrosion-resistant coating to withstand demanding road conditions.

Compatibility

Compatible Vehicles

- DODGE-I10 (2012-2014)
- HYUNDAI-ACCENT (2006-2011)
- KIA-RIO, RIO5 (2006-2011)

Key Features

Integrated Features

Integrated ABS Sensor, Corrosion-Resistant Coating, Robust Flange Design, Direct Replacement Fit

Quality Assurance

Operational Performance

1 Extended
Service Life Rating
