

Wheel Loader Bucket Tooth

This bucket tooth is designed for wheel loaders to enhance digging and loading capabilities. It is engineered for optimal penetration and wear resistance.

Product Overview

High-Performance Bucket Teeth

These professional-grade bucket teeth are specifically engineered for heavy-duty wheel loaders to ensure optimal penetration and superior wear resistance. Manufactured for demanding construction environments, the parts provide reliable digging performance and help minimize operational downtime. The components are built from high-quality materials to withstand intensive earthmoving and material handling applications.

Technical Specifications

Part Number	9.35
Certifications	CE, ISO

Service & Warranty

Quality Assurance

- 5-stage inspection process
- Pre-shipment photo and video verification
- 100% compensation for incorrect or damaged parts
- Export-standard packaging

Warranty Period	6 months
