

Wheel Loader Oil-Water Separator

This oil-water separator is designed for wheel loaders. It effectively removes water and contaminants from oil, promoting optimal hydraulic system performance and longevity.

Product Overview

High-Efficiency Filtration

This oil-water separator is a critical spare part engineered to maintain the integrity of heavy-duty machinery hydraulic systems. By effectively removing water and various contaminants from the oil, it helps ensure optimal performance, extends the lifespan of internal components, and promotes overall operational longevity. Designed for demanding work environments, it serves as a reliable solution for maintaining system cleanliness and efficiency.

Technical Details

Part Number	300080079
Application	Wheel Loader Hydraulic Systems

Quality & Compliance

Certifications	CE, ISO
Warranty Terms	6 months warranty for main spare parts

Service & Logistics

Service Highlights

- Five-stage quality inspection process
- Detailed photos and videos provided before shipment
- Export standard packaging
- Full compensation policy for incorrect parts or shipping damage
