

Wheel Loader Radiator Assembly

Radiator assembly designed for wheel loaders. This component is crucial for maintaining optimal engine temperature and ensuring efficient loader operation.

Product Overview

High-Performance Radiator Assembly

This radiator assembly is engineered specifically for wheel loader applications to ensure optimal engine temperature management. Designed for durability in demanding construction environments, it helps prevent overheating and maintains the overall efficiency of heavy machinery. This component is essential for reliable thermal regulation during intensive operation.

Technical Details

Part Number	4110000482
Component Type	Radiator Assembly

Compliance and Quality

Certifications	CE, ISO
----------------	---------

Service and Support

Quality Assurance Process

- Five-stage inspection process
- Detailed pre-shipment photo documentation
- Pre-shipment video verification
- Export standard packaging

Warranty Coverage	6 months for main spare parts
-------------------	-------------------------------
