

Wheel Tractor for Agricultural Applications

This wheel tractor is designed for agricultural and landscaping applications. It features a diesel engine, delivering high torque and fuel efficiency.

Overview

Versatile Agricultural Power

The DF-12L is a robust and versatile wheel tractor engineered for demanding agricultural and landscaping tasks. Featuring a high-torque diesel engine, it combines exceptional fuel efficiency with reliable power output. The ergonomic operator station ensures maximum productivity while reducing fatigue during extended shifts.

Performance

Key Performance Indicators

12 HP

Horsepower

Technical Specifications

Drive Train	Manual transmission for precise speed and power control
Steering	Power steering
Hydraulic System	Yes

Features

Core Features	Heavy-duty Axles, Sturdy Frame, Diesel Engine, Multi-attachment points
