

Wheel Tractor for Agricultural Use

This wheel tractor is a type of agricultural machinery used for various farming tasks. It is designed for pulling or pushing agricultural implements and machinery.

Product Overview

Professional Agricultural Wheel Tractor

This wheel tractor is a robust agricultural machinery solution designed for demanding farming operations. Featuring a specialized design with large rear traction wheels and agile front steering, it delivers consistent power for tasks such as plowing, tilling, planting, and harvesting. Its ergonomic setup, including a dedicated driver's seat and responsive steering, ensures efficiency and control during extensive field work.

Technical Specifications

Paint Finish

Blue

Core Equipment

- High-traction rear wheels
- Precision front steering system
- Internal combustion engine
- Operator-friendly seating area

Equipment Type

Wheel Tractor

Primary Applications

Plowing, Tilling, Planting, Harvesting
