

Wheelchair Electric Hand Bike Conversion Kit

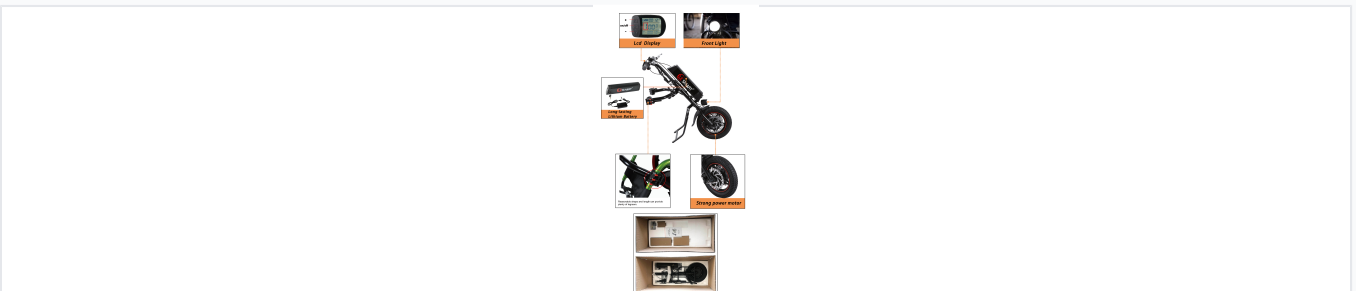

This electric hand bike conversion kit is designed to attach to standard wheelchairs, providing motorized assistance. It features a 350W motor and handlebar controls.

ADDITIONAL IMAGES

Product Overview

Ergonomic design providing ample legroom and powered mobility.

Enhanced Mobility Solution

This electric hand bike conversion kit is designed to transform standard manual wheelchairs into powerful motorized mobility devices. Featuring a 350W brushless motor and integrated battery system, it provides motorized assistance that allows users to navigate inclines, varied terrains, and outdoor environments with ease. With adjustable components to accommodate different heights and wheelchair frame diameters, this system offers an ergonomic and safe alternative to manual propulsion.

Performance Metrics

Effortless navigation on inclines and sloped terrain.

Performance Highlights

350 W

Motor Power

20 km/h

Max Speed

150 KG

Maximum Load

10 degrees

Climbing Ability

Technical Specifications

Intuitive control system with integrated battery switch and disc brake.

Technical Specifications

Feature	Specification
Voltage	36V
Motor Design	Brushless and geared
Wheel Size	12 inch
Battery Options	36V 8.8Ah / 10.4Ah / 11.6Ah
Display Type	LCD005
Braking System	Disc brake / Hand brake
