

Wheeled Fire Extinguisher Hose and Horn

This is a high-pressure hose and horn assembly for wheeled dry powder fire extinguishers. It features a robust nozzle for precise powder discharge and effective fire suppression.

Product Overview

Industrial-Grade Fire Suppression Component

This high-performance hose and horn assembly is specifically engineered for use with wheeled dry powder fire extinguishers. Built with a combination of brass, rubber, and plastic, it is designed to withstand the rigorous demands of industrial environments. Its robust nozzle construction ensures consistent and precise powder discharge, providing critical reliability for effective fire suppression.

Technical Specifications

Model Number	XHL02021
Construction Materials	Brass, Rubber, Plastic
Compatibility	Wheeled dry powder fire extinguishers

Compliance & Quality

Certifications Held
EN3 • CE • ISO
