

Wheeled Fire Extinguisher Hose and Nozzle

High-pressure hose and nozzle assembly designed for wheeled dry powder fire extinguishers. It is constructed with a durable, flexible rubber hose and a corrosion-resistant metal nozzle for effective powder dispersion.

Product Overview

Industrial-Grade Fire Suppression Component

This high-pressure hose and discharge horn assembly is specifically engineered for wheeled dry powder fire extinguishers. Constructed with a reinforced, flexible rubber hose, it is designed to withstand demanding industrial and emergency response environments. The unit features a corrosion-resistant metal nozzle and an integrated shut-off valve, ensuring reliable and controlled powder dispersion during fire suppression operations.

Technical Specifications

Design Features

- Corrosion-resistant nozzle
- High-pressure reinforced rubber construction
- Corrugated section for kink resistance
- Shut-off valve with controlled handle

Materials	Brass, Rubber, Plastic
Model	XHL02019

Certifications

Certifications

EN3 • CE • ISO
