

Whirlwind Air Pump

This air pump provides a medium pressure, high flow rate air source. It is oil-free, water-free, and designed for quiet operation, ease of service, and energy efficiency.

Overview

High-Performance Spiral Air Pump

This series of spiral air pumps is engineered as a medium-pressure, high-flow rate air source solution for industrial applications. Designed with a robust aluminum alloy construction, these units offer excellent heat dissipation and corrosion resistance, ensuring reliable operation in demanding environments. The system is oil-free, water-free, and quiet, providing an energy-efficient solution for pneumatic conveying, wastewater treatment, and general industrial processes.

Key Features

Key Features

Oil-free, Water-free, Quiet Operation, Energy Saving, Easy Maintenance, Corrosion Resistant

Technical Specifications

Performance & Model Specifications

Model	Power (W)	Pressure (kPa)	Output (m ³ /h)	Weight (kg)
PG-120	120	7.5	21	6
PG-370	370	15	64	10
PG-750	750	24	120	15.5
PG-1100	1100	28	180	20
PG-3000	3000	42	290	36
PG-5500	5500	50	520	55
PG-11000	11000	65	1050	112
PG-18000	18000	80	1050	130

Supported Voltages

- 220V/50Hz
- 380V/50Hz
