

White Aluminum Oxide Abrasive Paper for Dry Sanding

Abrasive paper designed for dry sanding applications, featuring white aluminum oxide abrasive grains for effective material removal and surface preparation. It provides a consistent scratch pattern and long-lasting performance on wood, metal, and plastic.

Product Overview

Professional Dry Sanding Performance

This premium white aluminum oxide abrasive paper is engineered for high-efficiency dry sanding applications across diverse material surfaces. Its specialized grain coating ensures consistent scratch patterns and reliable material removal, making it an essential tool for woodworking, metalwork, and plastic finishing. The long-lasting abrasive structure maintains performance throughout the sanding process, supporting both initial preparation and fine-finishing stages.

Technical Specifications

Grit Options

- 60
- 170

Abrasive Material	White Aluminum Oxide
Application Method	Dry Sanding
Compatible Materials	Wood, Metal, Plastic
