

White Ceiling Fan Component Set

This set includes essential components for assembling or repairing a ceiling fan. The kit features white mounting brackets, a motor housing, canopy, downrod and fan blade.

Overview

Professional Ceiling Fan Component Set

This white ceiling fan component set is designed for versatile assembly and repair applications in both household and industrial environments. The system features a robust multi-pole motor configuration engineered for high performance and reliability. With integrated double-bearing technology and a focus on quiet operation, this component set delivers significant airflow while maintaining a low noise profile.

Technical Specifications

Motor Configuration	3 or 5-pole motor
Bearing System	Double bearing

Performance Metrics

Key Performance Metrics

2.16 RPM
Stall Speed

Features

Key Features	Mute Operation, Large Wind Output, Household Compatible, Industrial Grade
--------------	---

Components

Included Components

- Mounting brackets
- Motor housing
- Canopy
- Downrod
- Fan blade
