

White Ceiling Fan with Integrated Light

This ceiling fan provides cooling with a clockwise switch in summer for a thermoelectric effect. It features five white blades, a gold-tone motor housing, and an integrated lighting fixture with white glass shades.

Product Overview

Energy-Efficient Climate Control

This white ceiling fan with integrated lighting offers a classic design suitable for residential environments. By utilizing clockwise rotation, it creates a wind chill effect that can lower perceived temperatures by approximately 8°C, allowing for significantly reduced air conditioning usage. This simple adjustment can lead to energy savings of 40% or more, making it a cost-effective solution for climate management.
