Product Overview

Professional Lighting Component

The White Ceramic Lampholder with Threaded Socket is a robust and reliable lighting component designed for secure and efficient lamp mounting. Constructed from high-quality materials, this lampholder ensures excellent heat resistance and electrical insulation, making it suitable for both residential and commercial lighting applications. Its standard threaded socket design accommodates a wide range of lamp types, including incandescent, LED, and CFL bulbs, providing a versatile solution for your lighting needs.

Technical Specifications

Material Composition

- ABS Housing
- Copper Internal Parts
- Bakelite Core
- Ceramic Body

Installation Features

Mounting Holes • Side Wiring Access • Heat Resistant

Socket Type

Threaded

Compatible Bulb Types

Incandescent, LED, CFL
